ABOUT ME

Systems and Software Development student with a strong interest in starting a professional career in IT as a QA Engineer, focused on Manual QA with growth toward Automation Testing. I am currently training as a University Programming Analyst and also hold academic training as a Systems Analysis Technician and University Technician in Free Software, gaining knowledge in testing, programming, systems design, and requirements analysis. I am motivated by working on real-world challenges, learning new technologies, and understanding systems in depth. I enjoy continuous learning and aim to join a team where I can contribute, continue growing professionally, and build my career within the QA field.

PROJECTS

QA Repository — API Test Postman (DummyJSON)

- Role: QA Engineer
- Technologies used: Postman, Newman.
- Designed and executed REST API test suites using Postman and Newman. Validated GET, POST, PUT, PATCH, and DELETE operations, including authentication and response verification on public practice APIs.

QA Repository — BlazeDemo

- Role: QA Engineer & Manual QA
- Technologies used: Apache JMeter, Cypress, OWASP ZAP, Axe, Lighthouse, and Postman.
- Developed a comprehensive testing plan for a flight booking platform. Executed security, accessibility, performance, and automation testing. Designed and executed test cases, identifying and reporting defects and incidents throughout the testing lifecycle.

QA Repository — Coffee Cart

- Role: QA Engineer & Manual QA
- Technologies used: Cypress, Postman, Newman, JMeter, OWASP ZAP, Axe, Lighthouse, Docker, Docker Compose, Jenkins, AWS (S3, DynamoDB), and Boto3.
- Developed an advanced QA automation project for a coffee ordering application. Designed and implemented a complete testing architecture with cloud integration and CI/CD pipelines. Automated end-to-end testing workflows and executed API, security, accessibility, and performance testing. Managed storage of metrics and testing artifacts in Amazon Web Services (AWS).

QA Repository — Juice Shop (OWASP)

- Role: QA Engineer & Manual QA
- Technologies used: Cypress, OWASP ZAP, Postman, Apache JMeter, Docker, Docker Compose, and Jenkins.
- Implemented a complete QA testing architecture for OWASP Juice Shop, including automation, security, performance, and API testing. Integrated Docker containers and CI/CD pipelines with Jenkins for automated execution and report generation.

QA Repository — Product Store

- Role: QA Engineer & Manual QA
- Technologies used: Cypress, JMeter, Postman, Newman, OWASP ZAP, Docker, and Docker Compose.
- Developed a QA project for an e-commerce platform focused on automation, API validation, performance, and security testing. Implemented a container-based testing architecture using Docker and Docker Compose for automated execution and report storage.

QA Repository — Space and Beyond

- Role: QA Engineer
- Technologies used: Cypress, Postman, JMeter, OWASP ZAP, Axe, Lighthouse, and Bash Scripting.
- Developed a complete QA testing suite for a space travel customization application. Implemented functional, API, security, accessibility, and performance testing. Executed end-to-end automation testing and documented defects throughout the testing lifecycle.

QA Web Testing Project

- Role: QA Manual & QA Automation Engineer
- Technologies used: Cypress, JMeter, Postman, OWASP ZAP, Jira, and Bash Scripting.
- Developed a comprehensive QA testing project for a web application dedicated to the Malvinas Argentinas tribute initiative. Executed manual and automated functional testing, as well as performance and security testing. Designed test cases and managed bug tracking and reporting through Jira.

EDUCATION

National University of La Plata (UNLP) University Programming Analyst Currently completed 4 out of 19 subjects.	2025 - Present
National University of the Littoral University Degree in Free Software 83.33% of the program completed.	2023 - 2026
Instituto de formación docente y técnica N° 210 Technical Degree in Systems Analysis	2024 2018
ISFD N° 13 “República de Nicaragua”, Zapala (Neuquén) High School Diploma in Physics & Mathematics	

COURSES

Complete QA Engineer Course Udemy	2026
EF SET English Certificate – 76/100 (C2 Proficient) EF SET	2026
English Discoveries Certificate – Upper Intermediate 1 Gobierno de la Ciudad de Buenos Aires	2025
Computer Repair Course Universidad Nacional de La Plata (UNLP)	2025
C# Level 1 Maxi Programa	2023

SKILLS AND LANGUAGES

- Technical Skills:** Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Linux (Debian/Ubuntu), Windows, MySQL, MariaDB, DynamoDB, Python, C#, Bash, HTML, CSS, JavaScript, Postman, Newman, Cypress, Apache JMeter, OWASP ZAP, Axe, Lighthouse, Jenkins, Bash Scripting, Pipeline Automation, Dockerized Test Execution, Git, Amazon Web Services (AWS), LocalStack, Docker, Docker Compose, Boto3, GitHub Pages, Jira.
- Languages:** Advanced English.
